# TAP ANTS

Your fast-track to a thriving community

TAP ANTS

What is Tap Ants?

Tap Ants is a **gamified launch platform** that connects its large and rapidly growing community with third-party crypto projects, gaming platforms, and product brands.

By featuring your project on the **Tap Ants platform**, you gain direct exposure to a highly engaged audience, driving awareness, interaction, and long-term user interest.

We Build Community

Tap Ants attracts & grows a large community of players:

- Simple, yet addictive gameplay.
- Users who are curious about new crypto projects.
- Ongoing Airdrops from multiple new projects.
- (Coming soon) Real world rewards & product discounts.

We Connect Community to Your Project

Tap Ants brings our web3 motivated audience to you:

- Our players return daily for gamified rewards earning.
- Players follow missions that teach them about your project.
- You build brand recognition through daily player interaction and active community discussion.
- Rewards motivated players stay engaged with your project.

How does Tap Ants Work?

Players tap to hatch and grow your branded in-game **"egg"** while completing 5–10 fun missions—like exploring your site, socials, surveys and videos. Over 30 days, they engage daily with your project, earning game rewards and unlocking custom content. Those who complete all missions and hit the target level qualify for your airdrop. Tap Ants' thriving community drives ongoing buzz. Your project gains traction through forum discussion and player word-of-mouth.

You'll reach thousands of users with creative missions that spark real understanding of your project—while growing a community that's excited to stick with you for the long term.

TAP ANTS

Additional Services

Token Voucher System. For pre-TGE projects, we provide smart contract-based vouchers that players can redeem for your token once your project launches.

NFT Container Technology. Our advanced Utility NFT system enables your project to deliver blockchain assets—such as rewards, identity credentials, or in-game items—directly to users via secure NFT wallets.

Community Moderation. As Tap Ants drives thousands of users to your social channels, we offer Telegram and Twitter/X moderation services to help your team manage questions, foster engagement, and maintain a vibrant community.

More To Know

Can I Limit My Airdrop?
Yes. Since users begin by loading your project egg, you can cap the number of eggs available to control participation and airdrop scale.

How Long Are Campaigns?
Our standard campaign runs for one month—ideal for building awareness and completing missions.

Why Partner with Tap Ants?

Instant access to a large, engaged audience.
